

DAC

Foiling Machine

Standard Features:

- ▷ Modular machine base
- ▷ Durable drive
- ▷ Multiple units can be mounted
- ▷ Large diameter foil rolls
- ▷ Spacious foiling area
- ▷ Exact temperature control
- ▷ IR sensor probes for reading wheel temperature

Performance Foiling Machine

The DAC series is based on the same reliable drive system used in the SPL profile sanding machine. The modular base allows for a flexible machine configuration and selection of application units. The capability of running with large diameter foil spools and the spacious foiling area allow for high production speeds. These machines can be placed into automated lines.

Type	DAC
Working width	up to 200 mm (8")
Transport speed	10 - 60 m/min (30-200 fpm)
